

Must be new and handmade
Washable preferred
You may use any pattern but we caution against any large holes, patterns with closed holes are preferred as patients tend to want to cover their balding heads
Must be made in a smoke free environment, pet hair free and odor free

Patients spend a lot of time lying down; either for rest or treatments, seamless hats are more comfortable to lay on.
Hats made with thinner yarn are better for summer use. Cotton yarns are soft and breathable, excellent for warmer climates.
We will accept wool and animal fiber hats but they must be clearly marked as animal fibers tend to be warmer and itchy, many patients are allergic to animal fibers.
Soft acrylic yarn is an excellent choice bear in mind if it feels scratchy in your hand it will be even more so on tender heads.
It is better if the cap is large enough to cover the ears and the nape of the neck.
Hats with embellishments, flowers, buttons and stripes tend to go first but please keep in mind comfort.
See our website at www.cuddlesofcourage for more guidelines

Please send a copy of this form along with your cap(s) to:
Please email us for a mailing address at:
